## ABSTRACT:

PURPOSE: To obtain an anti-carcinogenic promoter agent by specifically selecting a component having especially remarkable anti-carcinogenic activity from flavonoids known as crude drugs.

CONSTITUTION: The objective anti-carcinogenic promoter agent contains 5,7,2'- trihydroxyflavone or 5,7,2',3'-tetrahydroxyflavone of formula (R is H or OH) as a main component. The compound is a component extracted from OUGON (root of Scutellaria baicalensis) and having especially remarkable anti- carcinogenic action. The canceration of normal cell can be suppressed to an extremely low level by the continuous administration or ingestion of the anti-carcinogenic promoter and remarkable pharmacological effect can be attained thereby. Since the compound is a component of a crude drug OUGON, it is free from acute toxicity and can be continuously administered without causing the safety problem. On the contrary, it is preferable to continuously administer to a healthy person as a functional food owing to the canceration preventing effect on a healthy person.

## BASIC-ABSTRACT:

Inhibitor against cancer metastasis contg. twigs of Cinnamomum casia, roots of Paeonia lactiflora, fruits of Zizyphus jujuba, rhizome of Zingiber officinale and roots of Glycyrrhiza glabra or their extracts.

USE/ADVANTAGE - Inhibition of cancer metastasis. 2-15g/day in several portions. Safe compsn. with marked effect.

Twigs of Cinnamomum cassia, roots of Paeonia lactiflora, fruits of Zizyphus jujuba, rhizome of Zingiber officinale and roots of Glycyrrhiza glabra are pref. mixed at pts.wt. of 2.0-9.0, 2.0-6.0, 2.0-6.0, 0.5-6.0 and 0.5-4.0, respectively.

EXAMPLE - A mixt. of 6.0g, 4.0g, 1.5g and 2.0g of twigs of Cinnamomum cassia, roots of Paeonia lactiflora, fruits of

Zizyphus jujuba, rhizome of Zingiber officinale and roots of Glycyrrhiza glabra, respectively, was extracted with about 180g of purified water at 100 deg.C for 1 hr. The extract was filtered and spray dried to give 4.7g of extract. B16F10 melanoma cells were transplanted in the tail vein of 57BL/6 male mouse and 80 mg/kg of the extract was administered 4 times every other day. Cell numbers after 2 weeks was 72 +/- 12, while control gp. administered with saline soln. gave corresponding rate of 271 +/- 34 cells.
